Datum Newlyn. Tunnel Datum which is 100 metres below Ordnance OSGB36. All levels are in metres and relate to the
Coordinates are to be Ordnance Survey Datum
Key:
- Limits of land to be acquired or used (LLAU)
- Existing levels (shown in metres above Tunnel Datum)
- Listed buildings/structures
- Existing trees within surveyed area

Notes:
1. All dimensions and levels are approximate.
2. Any discrepancy between the location of features on the drawings and the parameters marked on the drawings are due to differences between the Ordnance Survey base and the topographic survey base, both of which have been used in the preparation of this drawing.

Area of Crossfield Street to be temporarily stopped up to form an emergency fire evacuation point.

Length of Crossfield Street to be temporarily opened up to provide a traffic diversion route during construction.

Extent of area to be temporarily stopped up for construction of a crossover for site access.

Extent of area to be temporarily stopped up for construction of an interception chamber.

1. This plan does not show stopping up and diversions of limited duration (e.g. hoarding erection, minor utility diversions and minor road closures).

2. Only rights of way in or close to worksites are shown. The full extents of rights of way are not shown where they cease to be relevant to the project.

Zone within which Work No. 22b would be located

Zone within which Work No. 22a would be located

Zone within which ventilation chamber(s) serving the shaft may be located

Zone within which electrical and control levels and ventilation (where appropriate) serving the interception chamber may be located

Key:
- Limits of land to be acquired or used (LLAU)
- Zone within which all permanent site structures would be located
- Zone within which the shaft would be located
- Zone within which permanent above-ground structures would be located (those listed in Table 7)
- Zone within which required landscaping would be located

Notes:
1. The Site Works Parameter Key Plan identifies each zone independently.
2. The zone within which the shaft would be located would include all permanent works including shaft walls (including appropriate allowances for construction tolerances) and if applicable underpinning. Shaft construction limitations on their respective sites provided they are located within the Limits of land to be acquired or used.
