Supplementary report on phase two consultation

Annex A – Written information provided at phase two consultation
Annex A: Written Information provided at phase two consultation

1.1 Project information papers

- **Build** provides information on the different types of sites required for the Thames Tunnel project and the typical construction activities that will be undertaken at each site.
- **Changes** explains how the project has changed since phase one consultation, including modifications to the tunnelling strategy for the main tunnel and changes to sites.
- **Consultation** sets out the consultation we have undertaken on the project to date, the scope of the phase two consultation and how interested parties can respond to this consultation.
- **Design** contains the design principles which have influenced the proposed permanent appearance of our sites once construction work is complete.
- **Environment** sets out the process being followed to assess potential environmental effects of the Thames Tunnel project.
- **Funding** sets out how much the project will cost and how it will be funded.
- **Managing construction** includes information on the measures our contractors will put in place at our sites during construction.
- **Odour** sets out our Air management plan and how it will work.
- **Options** outlines the various ways to deal with sewage overflows.
- **Overflows** sets out how London’s sewerage system works and why the capital has an overflow problem.
- **Regulatory framework** provides information on the various regulatory bodies that govern Thames Water.
- **Route and tunnel alignment** sets out the preferred route of the main tunnel and the reasons for our preference.
- **Route to consent** sets out the process of how we will get permissions to build the Thames Tunnel project.
- **Settlement** provides information on ground movement and what we will do to limit this.
- **Site selection** sets out the process we followed to find and select our preferred sites.
- **Timing** sets out the expected timescales for getting permissions and building the Thames Tunnel project.
- **Transport** contains information on the different transport options we have considered for delivering and removing materials from our sites.

1.2 Site information papers

- **Acton Storm Tanks**
- **Hammersmith Pumping Station**
- **Barn Elms**
- **Putney Bridge Foreshore**
- **Dormay Street**
- **King George’s Park**
- **Carnwath Road Riverside**
- **Falconbrook Pumping Station**
- **Jews Row**
- **Kirtling Street**
- **Heathwall Pumping Station**
- **Cremorne Wharf Depot**
Annex A

- Chelsea Embankment Foreshore
- Albert Embankment Foreshore
- Victoria Embankment Foreshore
- Blackfriars Bridge Foreshore
- Chambers Wharf
- Shad Thames Pumping Station
- King Edward Memorial Park Foreshore
- Bekesbourne Street
- Earl Pumping Station
- Deptford Church Street
- Greenwich Pumping Station
- Abbey Mills Pumping Station
- Beckton Sewage Treatment Works
- Other Works – contains details of minor works which may be required in association with the Thames Tunnel project.

1.3 Other project documents
- Air management plan
- Book of plans
- Code of construction practice – Part A: General requirements
- Community consultation strategy
- Draft waste strategy
- Design development report
- Interim engagement report
- Interim engagement report addendum
- Phase two scheme development report
- Preliminary environmental information report
- Site selection background technical paper
- Site selection methodology
- Statement of community consultation.
