Supplementary report on phase two consultation
# 1 Introduction

**21 Earl Pumping Station**

- 21.1 Introduction ........................................... 21-1
- 21.2 Number of respondents .................................... 21-1
- 21.3 Site selection ............................................. 21-2
- 21.4 Alternative sites ........................................ 21-5
- 21.5 Management of construction works ..................... 21-5
- 21.6 Permanent design and appearance ....................... 21-19
- 21.7 Management of operational effects ..................... 21-22
- 21.8 Our view of the way forward ........................... 21-29

**22 Deptford Church Street**

- 22.1 Introduction ........................................... 22-1
- 22.2 Number of respondents .................................... 22-2
- 22.3 Site selection ............................................. 22-2
- 22.4 Alternative sites ........................................ 22-14
- 22.5 Management of construction works ..................... 22-17
- 22.6 Permanent design and appearance ....................... 22-56
- 22.7 Management of operational effects ..................... 22-63
- 22.8 Our view of the way forward ........................... 22-77

**23 Greenwich Pumping Station**

- 23.1 Introduction ........................................... 23-1
- 23.2 Number of respondents .................................... 23-2
- 23.3 Site selection ............................................. 23-2
- 23.4 Alternative sites ........................................ 23-6
- 23.5 Management of construction works ..................... 23-8
- 23.6 Permanent design and appearance ....................... 23-32
- 23.7 Management of operational effects ..................... 23-37
- 23.8 Our view of the way forward ........................... 23-45

**24 King Edward Memorial Park Foreshore**

- 24.1 Introduction ........................................... 24-1
- 24.2 Number of respondents .................................... 24-1
- 24.3 Site selection ............................................. 24-2
- 24.4 Alternative sites ........................................ 24-13
- 24.5 Management of construction works ..................... 24-19
- 24.6 Permanent design and appearance ....................... 24-65
- 24.7 Management of operational effects ..................... 24-78
- 24.8 Our view of the way forward ........................... 24-100
## 1 Introduction

### 25 Bekesbourne Street

25.1 Introduction ........................................ 25-1
25.2 Number of respondents .............................. 25-1
25.3 Site selection ........................................ 25-2
25.4 Alternative sites ..................................... 25-4
25.5 Management of construction works ............... 25-4
25.6 Management of operational effects ............... 25-16
25.7 Our view of the way forward ....................... 25-20

### 26 Abbey Mills Pumping Station

26.1 Introduction ........................................ 26-1
26.2 Number of respondents .............................. 26-2
26.3 Site selection ........................................ 26-2
26.4 Alternative sites ..................................... 26-6
26.5 Management of construction works ............... 26-7
26.6 Permanent design and appearance ............... 26-16
26.7 Management of operational effects ............... 26-20
26.8 Our view of the way forward ....................... 26-24

### 27 Beckton Sewage Treatment Works

27.1 Introduction ........................................ 27-1
27.2 Number of respondents .............................. 27-1
27.3 Site selection ........................................ 27-2
27.4 Alternative sites ..................................... 27-3
27.5 Management of construction works ............... 27-3
27.6 Permanent design and appearance ............... 27-10
27.7 Management of operational effects ............... 27-12
27.8 Our view of the way forward ....................... 27-16

### 28 Jews Row

28.1 Introduction ........................................ 28-1
28.2 Number of respondents .............................. 28-1
28.3 Supportive and neutral feedback comments ..... 28-1
28.4 Objections, issues and concerns .................. 28-2
28.5 Our view of the way forward ....................... 28-2

### 29 Other Works

29.1 Introduction ........................................ 29-1
29.2 Number of respondents .............................. 29-1
29.3 Supportive and neutral feedback comments ..... 29-2

---

Supplementary report on phase two consultation
## 1 Introduction

29.4 Objections, issues and concerns ................................................................. 29-2
29.5 Our view of the way forward ........................................................................... 29-2

### 30 Feedback on the consultation process ......................................................... 30-1

30.1 Introduction .................................................................................................... 30-1
30.2 Continuity with phase one consultation and interim engagement ............ 30-1
30.3 Attendance at exhibitions during the phase two consultation .................. 30-8
30.4 Information provided during the phase two consultation ......................... 30-17
30.5 Other comments on the consultation process .............................................. 30-36
30.6 Our view of the way forward ........................................................................... 30-56
Supplementary report on phase two consultation

Supplementary report on phase two consultation
1 Introduction

Supplementary report on phase two consultation

Do you agree that we have identified the right way to address the key issues? (Q7b)

Objections, issues and concerns in relation to the measures proposed to address the key issues during operation

Supportive and neutral feedback comments in relation to air quality and odour during operation

Objections, issues and concerns in relation to air quality and odour during operation

Objections, issues, concerns and suggestions in relation to the measures proposed to address the effects of air quality and odour during operation

Objections, issues and concerns in relation land quality and contamination during operation

Supportive and neutral feedback comments in relation the natural environment (terrestrial) during operation

Objections, issues and concerns in relation to the measures proposed to address the effects on the natural environment (terrestrial) during operation

Objections, issues and concerns in relation to noise and vibration during operation

Objections, issues and concerns in relation to open space and recreation during operation

Objections, issues and concerns in relation to the measures proposed to address the effects on open space and recreation effects during operation

Objections, issues and concerns in relation to socio-economic effects during operation

Objections, issues and concerns in relation to the measures proposed to address the effects on the natural environment (terrestrial) during operation

Objections, issues and concerns in relation to planning and development during construction

Supportive and neutral feedback comments in relation to planning and development during construction

Objections, issues and concerns in relation to planning and development during construction

Objections, issues and concerns in relation to the measures proposed to address the effects on noise and vibration during construction

Objections, issues and concerns in relation to open space and recreation during operation

Objections, issues and concerns in relation to the measures proposed to address the effects on open space and recreation effects during operation

Objections, issues and concerns in relation to the measures proposed to address the effects on socio-economic effects during operation

Objections, issues and concerns in relation to land quality and contamination during operation

Objections, issues and concerns for the measures proposed to address the effects on the historic environment during construction

Objections, issues and concerns in relation to land quality and contamination during construction

Objections, issues and concerns in relation to the natural environment (terrestrial) during construction

Objections, issues and concerns in relation to the measures proposed to address the effects on the natural environment (terrestrial) during construction

Objections, issues and concerns in relation to the measures proposed to address the effects on the natural environment (terrestrial) during construction

Objections, issues and concerns in relation to the measures proposed to address the effects on open space and recreation during operation

Objections, issues and concerns in relation to the measures proposed to address the effects on open space and recreation during construction

Supervisory comments in relation to air quality and odour during operation

Supportive and neutral feedback comments in relation to air quality and odour during operation

Supportive and neutral feedback comments in relation to water and flood risk during construction

Supervisory comments in relation to water and flood risk during construction

Do you agree that we have identified the right issues that have influenced our permanent design for this site? (Q5)

Do you agree that we have identified the right key issues in the site information paper? (Q7a)

Do you agree that we have identified the right way to address the key issues? (Q7b)

WHS   World Heritage Site
WRWA  Western Riverside Waste Regulation Authority
1 Introduction

1.1.1 This supplementary report provides, in a tabular format, a detailed record of the phase two consultation with respect to the feedback received from respondents, an analysis of the comments and observations raised, and our response to these comments.

1.1.2 At the start of each chapter we set out the number of respondents who provide feedback comments in respect of the topic or site that is addressed in that chapter. This is broken down by statutory consultees, local authorities, landowners/significantly affected persons (hereafter referred to as landowners) and community consultees. Within each chapter at the start of each sub-section we also provide tables that summarise feedback comments to the standard quantitative questions set out in the phase two consultation feedback form. These table headings relate directly to specific questions on the feedback form. After the quantitative tables we provide further tables that set out details of the supportive and neutral comments as well as comments which raised objections, issues or concerns in connection with a particular site or proposal. The comments are structured around themes, and for each comment there is a record of the number of people who made the comment, as well as a reference to whether the issue or concern was raised by the community, landowners, statutory consultees or a local authority. Our response is provided to each of the comments or to a group of comments. For further details of the method used for analysing the feedback received, please refer to chapter 3 of the Main report on phase two consultation.

1.1.3 The supplementary report contains 30 chapters:

- chapter 2 provides details of the feedback comments received in connection with the need for the project, the proposed solution, the preferred tunnel route and the alignment of the Abbey Mills route, and identifies how the feedback is being taken into account in the development of our proposals.
- chapter 3 provides detailed responses to ‘other comments’ on the project and identifies and responds to further feedback comments that are not covered in any of the other chapters.
- chapters 4–28 provide details of the feedback comments received on each of the preferred sites on which we consulted at phase two consultation. The chapters are structured around the various phases of the project, including site selection, alternative sites, management of construction works, permanent design and appearance, and management of operational effects. Where specific objections, issues or concerns have been raised, the final column of the tables indicates our response as follows:
  - C – we are considering or proposing change or additional mitigation to that set out in our phase two consultation material
  - N – we do not propose to amend our proposals.
- A full list of the phase two consultation material is set out in annex A to this report.
- chapter 29 sets out the feedback comments received in connection to Other Works, our response to these comments and as per the bullet point above whether is response to specific objections, issues or concerns we are considering or proposing change or additional mitigation or do not propose to amend our proposals.
- chapter 30 sets out the feedback comments received and our responses to issues that were raised in connection with the consultation process.

---

1 Mitigation here refers to a wide range of measures set out in our phase two consultation proposals including for example, the Air management plan and other documents as well as those mitigation measures set out in the PEIR.
